Dividends

The Directors also announce a final dividend of 14.5 cents per share fully franked to shareholders registered on 24 August 2011, to be paid on 20 September 2011. The comparable 2010 final dividend was 14 cents per share fully franked. Together with the interim dividend of 12 cents per share, total dividends for the year are 26.5 cents per share, fully franked (last year 25.5 cents).

LIC Capital Gains

The final dividend will not include any Listed Investment Company capital gain dividend.

Dividend Reinvestment Plan

The Company operates a Dividend Reinvestment Plan ("DRP") under which shareholders may elect to have all or part of their dividend payment reinvested in new ordinary shares. Pricing of the new DRP shares will be at the average selling price of shares traded on the Australian Securities Exchange in the five days beginning from the day the shares begin trading on an ex dividend basis, without any discount. The last day for the receipt of an election notice for participation in the plan is 24 August 2011.

Asset Backing

The net tangible asset backing per share based on the market valuation of investments was \$7.24 at 30 June 2011 and \$6.87 at 31 July 2011. These calculations are after the tax effect of realised gains, before estimated tax on net unrealised gains and losses and before provision for the final dividend.

The Company is a long term investor and does not intend disposing of its total portfolio. If estimated tax on unrealised portfolio gains were to be deducted, the above figures would be \$6.36 at 30 June 2011 and \$6.10 at 31 July 2011.

Performance

The Company's net asset backing accumulation performance for the year to 30 June 2011 (assuming all dividends were reinvested) was an increase of 12.4% while the S&P/ASX 200 and 300 accumulation indices rose 11.7% and 11.9% respectively over the same period. The Company's returns are after tax and expenses and the impact of the Company's gearing for which no allowance is made in the indices. The market value of the investment portfolio moves broadly in line with the S&P/ASX 300 index and from 30 June 2011 to 11 August 2011 the index fell 10%, arising from the disruption in global financial markets.

Annual General Meeting

The Annual General Meeting of the Company will be held on Thursday, 13 October 2011 at 11.00 am at the offices of KPMG, 147 Collins Street, Melbourne.

Directors' Report (Continued)

Non-audit services

During the year KPMG, the Company's auditor, has provided taxation services in addition to their statutory duties. They received fees of \$7,425 for these services.

The board has considered the non-audit services provided during the year by the auditor and in accordance with written advice provided by resolution of the audit committee, is satisfied that the provision of those non-audit services is compatible with, and did not compromise, the auditor independence requirements of the Corporations Act 2001 for the following reasons:

- all non-audit services were subject to the corporate governance procedures adopted by the Company and have been reviewed by the audit committee to ensure they do not impact the integrity and objectivity of the auditor; and
- the non-audit services provided do not undermine the general principles relating to auditor independence as set out in Professional Statement F1 Professional Independence, as they did not involve reviewing or auditing the auditor's own work, acting in a management or decision making capacity for the Company, acting as an advocate for the Company or jointly sharing risks and rewards.

State of Affairs

In the opinion of the directors, there were no significant changes in the state of affairs of the Company that occurred during the financial year under review other than the value of the investment portfolio fluctuated broadly in line with market movements.

Environmental Regulation

The Company's operations are not subject to any significant environmental regulations under either Commonwealth or State legislation.

Events Subsequent to Balance Date

The market value of the investment portfolio moves broadly in line with the S&P/ASX 300 index and from 30 June 2011 to 11 August 2011 the index fell 10%, arising from the disruption in global financial markets. Apart from this, there has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature, likely, in the opinion of the directors of the Company, to affect significantly the operations of the Company, the results of those operations, or the state of affairs of the Company, in future financial years.

Likely Developments

The directors do not anticipate any particular developments in the operations of the Company which will affect the results of future financial years other than the value of the investment portfolio is expected to fluctuate broadly in line with market movements.

Indemnification

Details of directors' indemnification are set out in Note 15 to the financial statements.

AUSTRALIAN UNITED INVESTMENT COMPANY LIMITED

Notes to the Financial Statements for the Year Ended 30 June 2011

1. Statement of significant accounting policies

Australian United Investment Company Limited (the 'Company') is a company domiciled in Australia.

The financial report was authorised for issue by the directors on 12 August 2011.

(a) Statement of compliance

This financial report is a general purpose financial report which has been prepared in accordance with Australian Accounting Standards (AASBs) (including Australian Interpretations) adopted by the Australian Accounting Standards Board (AASB) and the Corporations Act 2001. The financial report of the Company complies with International Financial Reporting Standards (IFRSs) and interpretations adopted by the International Accounting Standards Board (IASB).

(b) Basis of preparation

The financial report is presented in Australian dollars. The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

The Company has not applied any Australian Accounting Standards or UIG Interpretations that have been issued as at balance date but are not yet operative for the year ended 30 June 2011 ("the inoperative standards") with the exception of AASB 9: Financial Instruments which was adopted on 7 December 2009 and disclosed in the 2010 Annual Financial Report.

The impact of other inoperative standards has been assessed and the impact has been identified as not being material. The Company only intends to adopt inoperative standards at the date at which their adoption becomes mandatory.

The financial report is prepared on a historical cost basis except that financial instruments are stated at their fair value.

The preparation of financial statements requires management to make judgements, estimates and assumptions that effect the application of accounting policies and reported amounts of assets, liabilities, income and expenses.

(c) Investments

The Company is a long term investor. Under IFRS, investments are classified as fair value through other comprehensive income. After initial recognition at fair value (being cost), investments are measured at fair value.

Unrealised gains or losses on investments are recognised as a separate component of equity until the investment is sold, collected or otherwise disposed of, at which time the cumulative gain or loss is transferred to the Asset Realisation Reserve.

AUSTRALIAN UNITED INVESTMENT COMPANY LIMITED

Notes to the Financial Statements for the Year Ended 30 June 2011

1. Statement of significant accounting policies (continued)

(c) Investments (continued)

The Company derecognises an investment when it is sold or it transfers the investment and the transfer qualifies for derecognition in accordance with AASB 139. Upon derecognition, unrealised gains/losses net of tax relating to the investment are transferred from the revaluation reserve to the realisation reserve.

Interest bearing investments are recognised at fair value and then measured at amortised cost. Amortised cost is calculated with any difference between cost and redemption value being recognised in the income statement over the period of the investment on an effective interest basis.

(d) Revenue from investment portfolio

The activity of the Company is that of an investment company, returns being in the form of dividends, interest, trust income, option premiums and sub-underwriting income. Dividend income is recognised in the income statement at ex-dividend date and all other income is recognised on an accruals basis.

(e) Taxation

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the company tax rate adjusted by changes in deferred tax assets and liabilities which arise from items being brought to account in different periods for income tax and accounting purposes.

The expected tax on disposal of securities in the investment portfolio is recognised directly in equity and as a deferred tax liability. Where the Company disposes of such securities, tax is calculated on gains made according to the particular parcels allocated to the sale for tax purposes and offset against any capital losses carried forward. The associated deferred tax liability is similarly adjusted and transferred to current tax payable.

When Capital Gains Tax rollover relief is elected on the disposal of securities, tax is still calculated on gains made (even though the income tax liability has been deferred until subsequent disposal of the replacement securities) and recognised in income tax expense for accounting purposes.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(f) Interest bearing borrowings

Interest bearing borrowings are recognised initially at fair value less attributable transaction costs.

Subsequent to initial recognition, interest bearing borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the income statement over the period of the borrowing on an effective interest basis.

Notes to the Financial Statements for the Year Ended 30 June 2011

AUSTRALIAN UNITED INVESTMENT COMPANY LIMITED

Notes to the Financial Statements for the Year Ended 30 June 2011

17. Capital Management

The Company's objective in managing capital is to continue to provide shareholders with dividends and capital appreciation over the longer term.

The Company's capital will fluctuate in accordance with prevailing market movements, and it may adjust the amount of dividends paid, issue new shares or sell assets to reduce debt.

There were no changes in the Company's approach to capital management during the year. The Company is not subject to any externally imposed capital requirements.

18. Financial Risk Management

AASB 7 – Financial Instruments: Disclosures identifies three types of risk associated with financial instruments (i.e. investments, receivables, payables and borrowings).

The Company has exposure to the following risks from its use of financial instruments:

- credit risk;
- liquidity risk; and
- market risk.

The Board of Directors has overall responsibility for the establishment and oversight of the risk management framework.

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The credit risk exposure of the Company lies principally in its cash and receivables to the extent of their carrying values and any accrued unpaid interest.

Cash

The company invests in short-term bank backed securities, cash management units with the MF Cash Management Fund and cash deposits with Australian banks, with a direct or underlying AA or A.1 credit rating assigned by Standard & Poor's, being a Recognised Rating Agency.

Receivables

Receivables are non-interest bearing and represent dividends, proceeds of sales and distributions yet to be received. The credit risk exposure of the Company in relation to receivables is the carrying amount.

Management does not expect any counterparty to fail to meet its obligations. Additionally, none of these assets are over due or considered to be impaired.

18. *Financial Risk Management (Continued)*

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

The Company's approach to managing liquidity is to ensure that it will always have sufficient liquidity to meet its liabilities as they fall due. The Company monitors its cash flow requirements and ensures that it has cash or access to sufficient borrowing facilities or liquid securities to meet all its financial obligations as they fall due.

Bank borrowings were \$100 million at the end of the financial year (previous year \$97 million) representing approximately 12% of the asset value of the Company. The Company has interest bearing commercial bill facilities in place with the National Australia Bank and Australia and New Zealand Banking Group which include both fixed and floating rate bill components. These facilities expire on various intervals through to 31 March 2016, unless these are renewed. Annual interest expense during the year was covered 6.1 times by investment income.

The major cash inflows for the Company include dividends, distributions and sales proceeds received. The major cash outflows are the purchase of securities and dividends paid to shareholders, both of which are able to be managed by the Company. The Company's investments are quoted on a prescribed stock exchange and are able to be realised if required.

Market Risk

Market risk is the risk that changes in market prices such as foreign exchange rates, interest rates and equity prices will affect the Company's income and the value of its holdings of financial instruments.

Inherently, the Company is not free of market risk as it invests its capital in securities whose market prices can fluctuate.

Based on a tax rate of 30%, a general movement in market prices of 5% and 10% would lead to a change in the Company's equity of \$29,304,336 (or 4%) and \$58,608,673 (or 9%) respectively, after tax.

Market risk is managed by ensuring that the Company's investment portfolio is not over exposed to one company or one particular sector. The relative weightings of the individual securities and the relevant market sectors are reviewed by the Board frequently.

The Company also has exposure to interest rate risk on its borrowings as detailed in Note 19, which is managed through conservative levels of gearing, fixing the interest rate on a portion of the debt and ensuring that there is appropriate interest cover at all times.

All of the company's investments are quoted in Australian dollars therefore avoiding any direct exposure to currency risk. Nevertheless, a number of the underlying company's businesses may have currency risk exposures.

Net Fair Values of Financial Assets and Liabilities

Valuation Approach

Net fair values of financial assets and liabilities are determined by the Company on the following basis:

Recognised Financial Instruments

Listed securities included in "Investments" are readily traded on organised markets in a standardised form. The net fair value of listed securities is determined by valuing them at the last quoted sale price as at balance date. In accordance with Australian Accounting Standards, this is considered "level 1" under the fair value measurement hierarchy, which is defined as quoted prices (unadjusted) in active markets for identical assets or liabilities. No adjustment for transaction costs necessary to realise the assets has been included as these are deemed to be immaterial. The net fair value of investments is set out in notes 8 and 23.

For all other financial assets and liabilities, the carrying amount closely approximates its fair value.
